

dynamex rise-it

The Dynamex™ Rise-It Paver Pedestal System, is an integral part of your hardscaping installation.

Designed to fully support the load of installed pavers and foot traffic, while reducing vibration & shock, the system is tested to withstand over 2,000 lbs of load.

The main advantages of the Rise-It system are simplified and reliable installation, improved drainage and protection of critical roofing membranes and moisture barrier systems.

Made from 100% Recycled Materials.

Precision manufactured and durably made from 100% recycled materials; Due to their high-load bearing properties and ease of leveling, the Rise-It system can be used to convert unused roof space into valuable patio real estate. Apply over broken sidewalks or uneven concrete areas to convert them into well-drained, level surfaces for entertaining, storage, or improved access. Redwood Plastics Paving Riser Shim System, is an integral part of your hydra-pressed concrete slab installation.

The fixed height pedestals can be combined with our low profile $\frac{1}{8}$ inch or $\frac{1}{2}$ pedestals. These provide the tightest fit to the surface below and are perfect for condo balconies, where door thresholds and railing height bylaws are a concern. Fixed height pedestals are the most cost-effective means of creating elegant, perfectly level porcelain flooring.

Applications: Rooftops, Terraces & Decks, Patios, Balconies, Verandas & Porches,
Around Swimming Pools.
